

# Secure and reliable internet connectivity

## Empower your network with IPv4 address leasing for IP Transit clients

Global IP Network | AS2914

**The NTT DATA Global IP Network is your trusted partner in navigating the challenges of IPv4 address depletion. Discover the advantages of our IP address leasing options designed specifically for our IP Transit customers.**

### Extensive IPv4 pool

With IPv4 address availability from regional internet registries being depleted, the NTT DATA Global IP Network offers up to /16 IPv4 addresses from our American Registry for Internet Numbers (ARIN) allocations for our clients to lease.

### Cost-effective solutions

All new IP address assignments have a transparent monthly recurring charge depending on how many addresses you lease. No upfront fees. This monthly charge is included in your IP Transit order.

### Routing security

We create a Resource Public Key Infrastructure (RPKI) Route Origin Authorization (ROA) for your Autonomous System (AS) Number. This strengthens your network's security by ensuring only authorized routes are advertised, protecting against route hijacking and misconfigurations. Available exclusively for customers using Border Gateway Protocol (BGP).

### Geolocation support

We implement the GeoFeed (RFC 9632) standard to publish accurate geolocation data for your IP addresses. This helps ensure your IP addresses are recognized as originating from the regions where you provide services, enhancing content delivery and compliance.

### Reverse DNS delegation

For IP address assignments of /24 and larger, we automatically delegate reverse Domain Name System (DNS) to your DNS servers. This gives you full control to manage PTR records, ensuring fast updates and improved operational control.

### Ready to begin?

[Contact us](#) to explore how NTT DATA's IP leasing options can boost your digital strategies. For IP requests of /28 or larger (IPv4), contact your NTT DATA representative directly.

**We require a contract of at least 12 months to lease IPv4 addresses.**

Read our [IP Address Public Policy](#) for more information.
